Defining the future of private healthcare
As the global population grows experiencing rapid lifestyle changes, we are presented with new healthcare challenges every day and the need for quality healthcare is ever more pressing.

At VPS Healthcare we are acutely conscious of these issues, and our philosophy is predicated on developing practical solutions.

Our interdisciplinary approach and integration across various specialties and units enable us to develop innovative responses to complex healthcare problems, thereby improving the overall quality of life wherever we operate.

The VPS Healthcare brands are a culmination of who we are and our core values.
Within a short span of time, VPS Healthcare has built a robust network of hospitals, medical centres and affiliated services across GCC, Europe and India. But our business is not only about building critical mass and growing revenues. With our network of over 125 clinics and hospitals, we go a step further to take quality healthcare closer to the people. We firmly believe that prevention is better than cure and are determined to be a positive force wherever we operate. VPS Healthcare was the first private healthcare group to offer free mobile mammography in the UAE, and thousands of women have been screened. As a tribute to H.H. Sheikh Zayed bin Sultan Al Nahyan, founding father of the UAE, we have launched a global initiative to provide 1,000 free cardiac surgeries to the needy. As part of this initiative, we have already conducted more than 175 free cardiac surgeries. In addition to this, we work with non-profit organizations like UAE Red Crescent to treat people in need.

Yes, we are motivated by philanthropy, but backed by sound business reasoning. By showing empathy and solidarity, we build strong and lasting relationships that are beyond value. VPS Healthcare has grown rapidly in the 11 years of its existence and we still continue to grow – regionally, internationally, and in diversity of activities.

Being sensitive to market needs and responding appropriately has been at the heart of our success coupled with an acute focus on quality in everything we do. And that will continue to be our guiding light as we enter our second decade.
VPS Healthcare’s multinational operations comprise a network of hospitals and medical centres, on-site, homecare and occupational health services, dental education, pharmaceutical manufacturing, healthy eating, patient concierge services, and retail pharmacies. The group’s integrated healthcare delivery system provides primary, secondary and tertiary care in various specialties.

In just 11 years, VPS Healthcare has established itself as a significant player in the private healthcare industry with 22 operational hospitals, over 125 medical centres and allied services. The group acquired renowned hospitals in India and has further expansion plans in the UAE.

The VPS Healthcare team of more than 13,000 employees includes over 1,700 doctors and served over 3.7 million patients in 2017. Our surgeons carried out nearly 54,000 procedures across 65 operating theatres.

VPS Healthcare serves patients from all segments of society, and excellence is at the core of all our brands. The group’s vision is to create a truly sustainable community welfare model for every strata of society.

One of the group’s strengths is the extent and diversity of the VPS Healthcare network, enabling patients to be referred from geographically remote facilities to more centralised super-speciality hospitals.

This network is being further strengthened by ambitious expansion plans. With multiple new projects under development, VPS Healthcare seeks to meet the growing demand for healthcare wherever we serve, achieving global benchmarks for both quality and service.
VPS Healthcare’s continued expansion illustrates the group’s commitment to sound governance policies and practices, reflecting its strengths as a dynamic organisation guided by teams of global professional standards.

Our teams work diligently to provide exceptional care, while ensuring compliance with regulatory requirements across multiple domains and sectors. This is particularly relevant in the GCC, where states and constituent Emirates tend to vary in their control requirements.

VPS Healthcare has several specialist committees working on the integration and sharing of governance-related services, establishing common standards for best practice across all entities and facilities.

Recognition by international accreditation authorities underlie our resolve to ensure excellence of governance. Various facilities have been endorsed by Joint Commission International (JCI) – the global authority on healthcare standards; the US College of Pathology – the prestigious authority on laboratory standards; and ISO – the International Standards Organisation.

VPS Healthcare’s LIFEPharma products are approved by the U.S. Food and Drug Administration (FDA), UK’s Medicines and Healthcare Products Regulatory Agency, and regulators and health ministries in the Americas, Europe, Africa, and Australasia.

Dr. Shamsheer Vayalil founded VPS Healthcare in 2007, having been a practicing radiologist at Sheikh Khalifa Medical City in Abu Dhabi. He studied at Kasturba Medical College in India where he completed his Bachelor’s degree in Medicine, adding a Master’s in Radiology from Sri Ramachandra Medical College and Research Institute.

After opening his first hospital in Abu Dhabi, he diversified into related healthcare businesses within the GCC and India.

Dr. Shamsheer is the youngest recipient of the Pravasi Bharatiya Samman Award, bestowed in 2014 when he also became the youngest Indian to receive an honorary Doctorate from Aligarh Muslim University, India.

Not only is Dr. Shamsheer a committed healthcare professional and astute entrepreneur, he is a generous philanthropist associated with significant political and humane causes. His strategies are fully demonstrative of his vision to work for a better tomorrow for all.

Dr. Shamsheer Vayalil
Chairman and Managing Director

Although VPS Healthcare businesses are designed to cater to different market segments, all share the same principle of premium quality – in patient care, clinical excellence, and across all administrative functions.

Each facility has its own dedicated proficient quality team striving to achieve ever-higher standards, guided by a group-wide quality committee. Our commitment has been endorsed by accreditation or certification from a number of global authorities and standards organisations, and recognition in the form of awards received from healthcare congresses and industry-specific programmes.

Eight VPS hospitals are accredited by Joint Commission International (JCI), the global quality authority that accredits healthcare organisations and programmes in the USA and more than 60 other countries.

Laboratories at two VPS Healthcare hospitals have qualified for accreditation by the College of American Pathologists (CAP) – widely recognised as the leader in laboratory quality assurance and as an advocate of high-quality and cost-effective medical care.

Three of VPS Healthcare hospitals also have ISO 9001 certification. In addition to this, laboratories of seven VPS Healthcare hospitals in the UAE have ISO 15189:2012 certification.
Constant growth poised for new phase

Between hospitals, medical centres, and pharmaceutical exports, VPS Healthcare has developed an extensive international coverage, a presence that is growing steadily as the group pursues opportunities for further diversification and strategic synergies. From starting operations in the UAE, VPS Healthcare extended its reach to other countries like Oman and India. Planning and negotiations are well-advanced on several initiatives where the VPS Healthcare model can bring healthcare benefits and strategic value to new markets.

Valued guests,
not patients

VPS Healthcare’s flagship brand combines premium hospital care with exceptional amenities. Burjeel’s essence – the art of healing – is a mixture of medical excellence with empathy and ambience designed to speed patient recovery. Burjeel operates ultra-premium hospitals, specialist centres, day surgery centres, and medical clinics in the UAE and Oman, where patients are referred to as ‘guests’. The company’s $1.5 billion expansion programme is led by the new Burjeel Medical City in Mohammed Bin Zayed City, a tertiary-care complex that will be the UAE’s largest private hospital when it opens in 2019.

The landmark project focuses on ultra-specialised domains such as oncology, long-term care, and wellness, along with advanced imaging, emergency, and endoscopy, a rehabilitation centre with prosthetics and orthotics services, outpatient clinics, and state-of-the-art operating theatres and critical care areas. The new facility will comprise a 400-bed hospital, long-term care villas, administrative buildings, and a mosque together covering 102,000m² of floor area.

Burjeel represents high quality of medical care, coupled with personalised hospitality services such as valet parking, exquisite VIP lounges, spacious lobby and garden areas, and upmarket restaurants and cafes. Although there are standard rooms, the emphasis is on suites, the largest with five bedrooms, so the entire family can stay in comfort and give their loved ones personal support while they undergo treatment.
Beauty at its finest

Tajmeel’s dental care embraces the VPS Healthcare values of premium quality service, delivered in a warm and reassuring environment. There are three facilities in Abu Dhabi, including the Tajmeel Kids Park Medical Center, which combines dentistry with a visit to the zoo. The facilities in the UAE are committed to providing quality dental service by experts in all dental specialities, rendering comprehensive state-of-the-art treatment to adults and children. Equipped with the latest technology, these centres set high benchmark of service in oral care, especially cosmetic procedures.

Tajmeel takes pride in continuing to raise the quality of products and services – responding to the challenging needs in a changing healthcare landscape. Tajmeel’s goal is to be one of the most trusted dental services provider in the UAE, delivering satisfaction through the science of healing and the art of care.
Whenever your family needs us

Medeor 24x7 Hospitals and Medical Centres take the best principles of the hospitality industry, combined with state-of-the-art medical facilities to provide high quality care for patients at optimum cost.

The Medeor 24x7 Hospitals in Abu Dhabi, Dubai and Al Ain provide round-the-clock services including emergency rooms and on-site pharmacies to ensure patients get the attention they need, whenever they need it.

Medeor medical centres based in retail malls and other convenient locations bring a range of everyday services closer to the customer.

The goal is always to make the journey to wellness quicker, easier, and more comfortable – and thereby as stress-free as possible.

Staff always goes the extra mile to ensure that each patient receives the individual care needed for rapid recovery – forming a proactive partnership with the emphasis on a holistic and long-term view of the patient’s health.

Medeor 24x7 Hospital in Abu Dhabi is located in the central business district, providing ample capacity without compromising patients’ personal space. Patient comfort is paramount.

In Dubai, Medeor 24x7 Hospital has a number of specialties, complemented by various centres of excellence. The hospital combines the latest advances in medicine with a refreshing level of warmth and compassion in a family environment.

In Al Ain, Medeor 24x7 International Hospital delivers personalised care with privilege. The hospital believes that patients want more than just treatment; they want superior care and personalised attention.
Mass market, personal attention

LLH Hospital provides highly cost-effective yet reliable healthcare services, complemented by personal attention. While catering to the mass market, LLH Hospital maintains the same level of medical expertise that is synonymous with all the VPS Healthcare brands.

Two LLH hospitals and a medical centre are situated close to Abu Dhabi’s business and industrial hubs. The mission is to preserve and restore health and well-being through extensive use of empowerment and technology, adhering to core values of compassion, teamwork and integrity. Over the years, LLH Hospitals have become the destination of choice for thousands of residents, who trust the dedication of medical staff in attending closely to each patient’s needs with respect and dignity.

LLH Hospitals and Medical Centre are driven by quality, resulting in recognition by various accreditation authorities from across the world. All facilities and services have been designed around rapidly growing patient needs and demands, constantly keeping abreast of the latest developments in medicine and adopting international best practices to improve service quality.
Easy access to premium care

Lifecare Hospitals represent superior services, conveniently available and accessible to the communities living in Abu Dhabi’s Mussafah and Baniyas areas. The two multi-specialty hospitals are fully equipped with state-of-the-art technology and offer more than 15 medical and surgical specialties and clinical services.

Accredited by Joint Commission International (JCI) – Lifecare Hospitals have experts in various medical specialties including general medicine, gynaecology, paediatrics, dermatology, dentistry, cardiology, neurological, ophthalmology, pulmonology, and critical care. Hospital personnel including paramedics and support staff are committed to a compassionate patient-centric approach that addresses day-to-day healthcare needs.
Warmth of an Omani welcome

The Lifeline Hospitals – at Sohar and Salalah in Oman – offer quality and affordable medical care with experienced doctors, dedicated paramedics and support staff who have cutting-edge facilities at their disposal.

The hospitals offer a wide range of services including outpatient department, inpatient facilities, 24-hour emergency care and in-house pharmacies, and a wide range of support services.

Lifeline Hospital in Sohar offers multiple medical specialties with compassionate patient-centric care to address the community’s day-to-day needs. Lifeline Hospital in Salalah has a 24-hour accident and emergency department.

Lifeline Hospitals’ comprehensive services are tailored to individual needs and brings quality healthcare within the reach of every segment of the communities they serve.
VPS Rockland’s three multi-specialty hospitals in Delhi NCR provide superior care through a combination of advanced medical facilities, clinical excellence, and high-end technology. VPS Healthcare acquired Rockland in 2016, representing an investment of about $22 million including further development of the network. VPS Rockland in Qutab has about 20,000m² of built area and advanced intensive care services. VPS Rockland at Dwarka, a compact 102-bed facility offers services from basic specialties to advanced neuro-spinal and cancer surgery. The third in Manesar is a 505-bed multi-specialty hospital occupying a 2-hectare campus and a built area of 50,000m².

VPS Rockland in Manesar is a tertiary care hospital serving a region of more than 15,000km². Its strategic location close to the arterial roads provides ease of accessibility that is essential to treat emergency and trauma cases.
VPS Lakeshore Hospital in Kerala, India, is a multi-faceted super-specialty hospital with a unique blend of state-of-the-art infrastructure, highly experienced professionals, and latest medical technology. It is also one of India’s leading academic medical centres with a range of postgraduate programmes. The hospital opened its doors to integrated healthcare in 2003, becoming part of VPS Healthcare in 2016. VPS Lakeshore Hospital is widely recognised as a leader in medical education, research, and innovative patient-centred clinical care. It has incorporated innovative diagnostic and therapeutic medical technologies, keeping pace with the progress of medical science.

VPS Lakeshore Hospital offers multi-organ transplantation, gastroenterology, GI surgery, medical and surgical oncology, joint replacement, accident and trauma orthopaedics, sports medicine, neurology, neurosurgery, cardiology, cardiovascular surgery and gynaecology. It also supports pioneering research and treatment for life-threatening diseases through core facilities and services. Special research attention is paid to diseases endemic to its local area of Kerala.

Training in advanced procedures is given to doctors from India and abroad, and continuing medical education courses are conducted on a regular basis for postgraduate students to enhance their skills.
Guarding lives on isolated sites

As one of the largest providers of on-site healthcare management, occupational health solutions, and medical emergency transfer from remote work sites, Response Plus Medical handles the healthcare of more than 2.5 million people in the UAE workforce.

The company has five specialist areas of operation:

- **Onsite medical services:** assess workers’ health conditions on operational sites and provide support in preventive measures, emergencies, and day-to-day treatments. The onsite team is highly experienced in remote location management including primary healthcare, general practice and front-line trauma management.

- **Occupational health services:** provide customised employee health check-ups, along with training in the use of protective clothing, maintaining a healthy lifestyle, and prevention of transmissible diseases.

- **Mobile Clinics:** bring high-quality medical care and critical medicines directly to patients, using vehicles with examination rooms, laboratory services, X-ray, ultrasound, ECG, and ancillary resources to provide the best medical care in hard-to-reach areas.

- **Providing medical support services for sporting and entertainment events:** coordinating specialised medical and ambulance services.

- **RPM has one of the largest private fleet of ambulances in Abu Dhabi equipped for acute emergencies, from initial evaluation to resuscitation, treatment, diagnosis, stabilisation and monitoring.**
Creating a safe work environment

OccuMed has a long history of working across a range of industries and business sectors. The facility has the most modern equipment for accurate and reliable test results, covering all occupational medicine needs from audiometric to spirometry tests, ECG, treadmill test, ultrasound, ophthalmology, X-ray, and full-scale laboratory service, delivered on-site at the client’s premises or at the clinic itself.

Screening services include health surveillance and medicals for the construction industry, automotive workshops, SME manufacturing sector, users of heavy industrial equipment, food industry and food handlers, and oil and gas workers. All services are provided by experienced medical team comprising of occupational health doctors, nurses, and technicians.

Based in Abu Dhabi, OccuMed conducts occupational health risk assessments and identifies hazards that could cause illness, works with companies to minimise employee absence and promotes a healthy work environment.

On-site or off-site medical tests are conducted for employees from different departments and job functions.
Our brands | Educare Institute of Dental Sciences

A new generation of dental professionals

The Educare Institute of Dental Sciences, based in Kerala, India, provides advanced dental education. It is affiliated to Kerala University of Health Sciences and recognised by the Dental Council of India. State-of-the-art facilities help develop a positive mind-set and the necessary aptitude in students over five years of rigorous practical and theoretical studies.

Students learn in a fully-equipped dental laboratory, complete with specialised pre-clinical and clinical facilities. Education is based primarily on practical exposure to a large number of patients and dental conditions, thus producing skilled professionals.

Educare Institute of Dental Sciences has a long-standing reputation of providing easy access to dental treatment at affordable rates. Hostel accommodation is provided for out-of-town students and the library offers a vast collection of academic books as well as professional papers, international journals, reference materials, and newsletters. The Institute is also extensively involved in research, studying baseline dominance of dental diseases and establishing strategies to control them, as well as monitoring long-term effects. Online knowledge-management helps to keep students and faculties abreast of the latest developments in professional and academic practice.
Aspiring global player

Within the next decade, LIFEPharma will grow to become a multi-million-dollar enterprise in finished dosage medication, with a competitive presence in the US, Europe, Canada, Russia, Brazil, South Africa, Mexico, Japan, and China, as well as licensing arrangements in other parts of the world.

Besides the GCC and Africa, LIFEPharma is already exporting medicines to Asia, Europe, North and South America. Aiming to become a global player in pharmaceutical manufacturing, LIFEPharma has created production facilities of the highest standards and achieved accreditation from many regional and international health authorities.

The company’s current Dubai factory manufactures tablets, capsules, liquid suspensions, and syrups. It has been approved by the U.S. FDA, European Medical Agency, as well as health ministries in the UAE, Kenya, Ethiopia, Uganda, Bahrain, Ivory Coast, and Iraq.

LIFEPharma has embarked on major expansion, investing over $250 million in a new pharmaceutical research and manufacturing plant in Abu Dhabi, with the goal of being the first in the GCC to produce cancer-treating medication. The 17,000m² plant will adhere to international standards specified by globally recognised authorities such as the UK’s Medicines and Healthcare Products Regulatory Agency, and the U.S. FDA.

Alongside cancer control and research, it will produce vaccines, sterile injections, and solid dosage oral medication for the treatment of illnesses such as hepatitis and influenza.
Our brands | Ziva

Pure Brilliance

ZIVA means ‘Brilliance’ and the brand holds this promise through a range of FMCG and cosmetics products offered across all customer demographics in the region.

The brand abides by its mission of understanding the need for personal care, hygiene & cosmetic products within the niche market while providing quick & easy solution which can best satisfy the customers, as we follow international best practices.

Using years of research and development, ZIVA is on course to become an industry leader in personal hygiene products.
Medical emergencies are unpredictable. With highly trained in-flight paramedics, the Air Ambulance Transport Services department of VPS Healthcare specialises in the following services:

We provide Medical Repatriation services for patients who need medical transportation including bed-to-bed transfers back to the home country. Our Helicopter Emergency Medical Services (HEMS) are equipped to air-lift patients to specialised medical centres.

In association with the Department of Health (DOH), we also provide Fitness Assessments for Flying along with Medical Escorts who are trained to accompany patients on commercial flights to ensure a medically stable journey. VPS Healthcare, with support from government entities, undertakes Medical Evacuations from various environments to ensure safe transportation, on-going treatment and rehabilitation of patients.

Our International Medical Concierge Services facilitate easy access to highly specialised treatment in Europe for patients from across the world. While we cater to non-clinical needs of patients and visitors, we also help them identify specialists, provide detailed hospital information, assist with reducing readmissions, build amenity packages, pre and post discharge support for our guests looking for world-class medical treatment.
Easy access to international medical care

As medical research and technology take giant strides, some facilities are able to provide highly specialised treatment for complex medical conditions. Today, Germany has distinguished itself as a forerunner in medical excellence and allied services.

At Ludwig Royal Service - VPS Healthcare’s concierge services in Germany – we have partnered with some of the most prestigious medical institutions that ensure easy access to highly specialised treatment for patients from across the world along with catering to all non-clinical needs of patients and visitors.

We identify specialists, provide detailed hospital information, assist with reducing readmissions, build amenity packages, pre-and post-discharge support for our guests looking for world-class medical treatment in Europe. Ludwig Royal Service is certified by the Chamber of Commerce for passenger transportation.
Culinary delight

Keita Catering represents a dynamic new presence in corporate and event catering. From small-scale private catering and 5-star events to partnering with hospitals and schools, we offer a full range of catering options.

Our rapid growth in the last few years reflects our desire to apply a unique culinary vision to our events with an impeccable service-orientated approach. It’s this challenge that keeps our task fresh and interesting and motivates us to excel.

At Keita’s kitchen in Dubai and Musaffah, Abu Dhabi – the largest stand-alone kitchen in the UAE – there is no limit to the scale of the spreads we create, and we have mastered this process through efficient time management and expert skilled personnel combined with fresh ingredients and outstanding culinary skills.
Burjeel Medical City

Burjeel Medical City (BMC) is a Tertiary Care Facility in the heart of Mohamed Bin Zayed City, Abu Dhabi. BMC is expected to become the largest private Medical Healthcare Facility in the UAE. The facility will comprise of over 400 beds, Long-Term Care Facility, Long-Term Care Villas, an Administrative Building and an Educational Tower – all covering a GFA of 120,000m².

At the centre of the BMC lies the Main Hospital with its basement, 4 Podiums, 6 Towers and a Helipad for Airborne Patient Transport. This landmark project focuses on ultra-specialized domains like Oncology, Long-Term Care, and Wellness. It also includes an advanced Imaging department, an Emergency Department, Endoscopy, a Rehabilitation Centre with Prosthetics & Orthotics services, Outpatient Clinics, a large retail area, and a state-of-the-art Operating Theatres & associated Critical Care Areas.
Burjeel Hospital, Al Ain, is a 100-bed multispecialty hospital, which is due to open later this year.
Burjeel Hospital, Sharjah, is a 75-bed multispecialty hospital, which is due to open later this year.
Social responsibility is ingrained in the VPS Healthcare ethos

Thousands of people trust VPS Healthcare with their health every day. Anything that matters to their health matters to us. But the commitment to wellness extends beyond the everyday activities of the group’s hospitals and clinics. This has earned VPS Healthcare its widespread reputation as a socially responsible organisation.

By its nature, VPS Healthcare is a community-centric organisation. Providing quality healthcare for all, at affordable rates, is a core business principle. In 2010 VPS Healthcare became the first private healthcare group to deploy mobile mammography units to increase awareness about breast cancer, an endeavour that led to a Guinness World Record in 2014 for the largest simultaneous self-examination for breast cancer.

As a tribute to the late H.H. Sheikh Zayed bin Sultan Al Nahyan, founding father of the UAE, VPS Healthcare undertook the first global initiative to provide 100 free heart surgeries for under-privileged people across the world. This was completed in 2014 and subsequently increased to 1,000 free heart surgeries. As part of the initiative, 30 children from Iraq and five from Ethiopia were airlifted to India to undergo life-saving surgeries. VPS Healthcare has contributed to the welfare of Syrian refugees under the ‘Our Hearts with the People of Syria’ campaign. The Group has also made donations to the Indian Prime Minister’s National Relief Fund for Jammu and Kashmir flood victims.

VPS Healthcare has joined hands with the UAE Red Crescent to support the ‘Yemen: We Care’ campaign and has also been actively engaged with the Government of India’s ‘Swachh Bharat Abhiyan’, the country’s largest cleanliness drive launched in 2014 by Prime Minister Narendra Modi. Under the campaign VPS Healthcare has helped clean streets, roads, and infrastructure in more than 4,000 cities and towns.

VPS Healthcare also supported the families of victims of the tragic 2010 Mangalore plane crash in India, offering jobs and educational assistance. Many of those who took up the offer still work with the organisation.

VPS Healthcare supported the Ministry of Health, UAE’s initiative for Syria Humanitarian Aid.
